

INTRODUCING THE TURBO SERIES OF DEDOLIGHT FOCUSING LED LIGHTS

NEW CONFIGURATION,
SMALL FIXTURE,
HIGH OUTPUT.
SUPER SILENT
ACTIVE COOLING.
IDEAL FOR
THE SMALL TEAM.

The actual light sources have now nearly doubled in performance in a housing similar to our DLED4 (40W unit), but now operated with 2x 90W in the bicolor version.

Although these light heads provide significantly higher light output, and in spite of the added cooling devices, the weight of these light heads is still identical with the original DLED4, 40W light head.

Only the ballast has grown somewhat, to accommodate the increased power. Alternative power supplies still allow battery operation.

The bicolor versions are continuously adjustable from 2700K all the way to 6500K. Pure monochrome versions in daylight or tungsten are also available.

The noise level of the whisper cooling will surprise you – even under the most critical conditions.

Kits can include soft boxes, imager/projection attachments. Complete 3-light-kits (DLED7) with plenty of accessories are still light enough for checked-in baggage on flights, packed in super sturdy cases with wheels and pull-out handle.
